A WORD FROM THE RECTOR

Collegium Civitas is a higher educational establishment founded in 1997 by a joint initiative of Professors from the Polish Academy of Sciences. The University has the status of a not-for-profit organization which corresponds with our societal and civic mission. Since the very beginning Collegium Civitas has developed and maintained the highest educational standards comparable with those offered by the most renowned European and American Universities. We hold top positions in the National rankings of Universities in Poland, employers from a wide variety of sectors hold very positive opinions of our students and most importantly, Collegium Civitas graduates go on to have highly successful and satisfying career paths.

At Collegium Civitas we consider the delivery of the highest level of education to be a major priority. Our faculty combines quality academic instruction, with many of our Professors and Lecturers coming from the Polish Academy of Sciences, with a practical approach brought in by the best Polish and foreign specialists in the fields of diplomacy and public administration, security and international relations, media and journalism, business and market studies. This unique characteristic of our University allows us and our students to meet contemporary challenges. We have remained faithful to the mission of the University, formulated at its inception – to educate future public elites, politicians, media experts, business leaders, researchers and analysts. At Collegium Civitas we also strive to hand down to our students fundamental civic values, symbolically related to the name of the University itself.

Our aim is not only to transfer to our students fascinating interdisciplinary knowledge allowing them to gain a sophisticated understanding of social phenomena, but also to facilitate the acquisition of practical skills, which will guarantee them an advantageous position on the job market and open career paths in a wide array of professional undertakings.

Since the very beginning Collegium Civitas has been a bilingual University. We offer a wide range of degree programmes conducted in the English language. Collegium Civitas is honoured to welcome students from over 50 countries. Our University has signed around 60 agreements within the Erasmus student exchange programme, as well as many bilateral contracts with other Universities around the world, including America.

The motto of Collegium Civitas is Lifelong Learning, our academic offer contains different types of courses: from Bachelor and Master degree programmes, through to Postgraduate and Doctoral studies, up to courses offered within the University of the Third Age. The common trait that unites all our students and course participants is their will to build-upon and improve their qualifications and skills and broaden their interests through direct contact and interaction with the best academic and professional faculty.

We remain loyal to the idea of educating our students in accordance with civic values, yet we try to avoid imposing our vision onto them. This principle can be found in our motto: “Gradu diverso, via una” – which means “At a different pace, by the same road”. What we mean by this is that we are heading for a common goal with full respect for the diversity and individual ways we take to reach this goal.

Professor Stanisław Mocek

Prof. Zygmunt Bauman delivering the inaugural lecture during the 2011/2012 Academic Year Inauguration Ceremony.

Agnieszka Holland, a Polish screenwriter and the director of the movie "In Darkness", an Oscar award nominee, at a conference carried out at Collegium Civitas.

Naomi Klein, a world-famous author of critical essays and best-selling books, such as "No Logo".

Professor Rajmohan Gandhi, a grandson and biographer of Mahatma Gandhi, delivering a speech at Collegium Civitas.
Nine major areas of BA, MA and postgraduate studies in the fields of: Sociology, International Relations, Journalism and New Media as well as Individual Interdisciplinary Studies.

Area of study: **MARKETING AND MANAGEMENT**

Marketing and management is one of the most developed and profitable markets in Poland. The new media sector is recruiting specialists for various positions. Collegium Civitas prepares students to work as experts, management personnel, individual researchers creating concepts and conducting empirical research.

The programme includes:

- new trends in Internet marketing and communication in social media
- interactive marketing
- Human Resources and PR tools
- Cross-cultural management and sociology of culture

Area of study: **PSYCHOLOGY AND COACHING**

Along with the personal and career development, psychological needs of individuals and society have increased. A specialization in the area of psychology and coaching is in high demand on the job market. Collegium Civitas is preparing future specialists of HR, personal coaches and business consultants.

The programme includes:

- coaching and stimulation techniques of personal development
- team management
- interpersonal communication techniques
- procedure and techniques of evaluation research

Area of study: **ANALYSIS OF INFORMATION AND SECURITY**

Collegium Civitas offers programmes in the field of national and international security and information analysis. Students gain knowledge about terrorism threat assessment. They also study methods of analysis of phenomena influencing the stability and security of the state, organizations or companies in different economic sectors. Studies are created for those who plan their career as information analysts in public administration, civil service institutions, analytical centers and business. Collegium Civitas runs a Center for Research on Terrorism which is unique in Poland.

The programme includes:

- methodology and techniques of information analysis
- planning and management of analytical teams operation
- system analysis of crisis and conflict situations
- risk analysis
Area of study: JOURNALISM AND NEW MEDIA

Journalism and New Media at Collegium Civitas is recognized as the best practical programme of study in Poland! The Ministry of Science and Higher Education has awarded Collegium Civitas a prestigious grant in the frameworks of “Contest for Million” competition in the area of practical studies. Practical classes, journalist workshops, development of editing know-how and getting insights into the daily routines of a newsroom and editorial staff - the knowledge gained in the field of journalism and new media in Collegium Civitas gives you great career opportunities in media and PR. Students of Collegium Civitas participate in workshops and practical classes from the very beginning of their studies. Internships are offered in the editorial offices of Polish newspapers, magazines, television stations, radio stations and others dealing with life-style, cinema and sport.

The programme includes:
- analysis of media discourse
- Internet journalism
- persuasive strategies
- creating press releases, radio and television information
- Internet evolution and media convergence
- business models of media

Area of study: DIPLOMACY

Being a Diplomat demands knowledge of international relations, rules set in diplomatic spheres and the functioning of European Union institutions. Collegium Civitas prepares students for positions in local government institutions, NGOs, economic organizations and international businesses.

The programme includes:
- diplomatic, consular, international and European Union law
- communication and negotiation techniques
- forms of public diplomacy
- common policy of international affairs and security
- institutions and decision making processes in EU
- environmental security, power and trade EU policy

Area of study: INTERNATIONAL AND CROSS-CULTURAL RELATIONS

Professional career and business administration demands a deep knowledge of cross-cultural relations and competence in the field of international relations. Studies in Collegium Civitas are based on a modern educational programme which reflects civilization progress and contemporary tendencies. Bachelor and Master studies cover negotiations and international business, cross-cultural communication, European and Asian studies, Development cooperation and public administration.

The programme includes:
- international law and the world economy
- European integration
- cross-cultural relations
- the theory of international relations
Area of study: SOCIETY, LIFE-STYLE AND ART

Study programmes in the field of Society, life-style and art deepen your knowledge of the surrounding world and allow you to understand social phenomena and processes. Moreover, you will learn how to use art and life-style knowledge at work. During your study you will become familiar with the main problems and ideas of a 20th century, contemporary, culture, traditional and modern art, including cinema. Studies provide an opportunity to get experience in the analysis of art, understanding of the meaning and functioning in direct contact with art objects and exhibitions, in galleries and during film presentations. The programme broadens your competence in discussing cinema issues.

The programme includes:

- activity and functioning of youth subcultures
- criminology research methods
- demographic problems in Poland and European Union
- psychological crisis intervention
- art development in particular historical periods
- film economy and meetings with reviewers

Area of study: SOCIOLOGY, CULTURE, COMMUNICATION

Effective communication in multicultural and diverse societies and groups requires cross-cultural sensitivity and knowledge of communication tools. Your choice of study in the area of Sociology, culture and communication allows you to work in these fields and get a job in research institutions, social services, media, administration or cultural institutions.

The programme includes:

- functioning of social structures and institution formation
- development of the theory of social bands
- conflict management and problem solving
- communication models
- techniques, rules and models of communication languages

INDIVIDUAL INTERDISCIPLINARY STUDIES

Individual Interdisciplinary Studies at Collegium Civitas are created for those who would like to cross the disciplinary borders and to broaden their knowledge beyond the programme of just one field of study. Every student has a tutor who coordinates their educational development and provides programme path consultations. The tutors help to choose classes, advice on research projects and the topic of the diploma thesis. Students of Individual Interdisciplinary Studies in Collegium Civitas can attend classes of every specialization provided including lectures in English.
Choose your specialization in the frame of 9 areas of study at Collegium Civitas:
